

# What to Expect when Buying a Generator

## Home & kW Assessment

Greenfoot Home Comfort Advisor conducts an in-home assessment to determine the best generator option for your home.

## HOME OWNER HOME WORK

### Do you already have Gas?

**YES:** Home work is complete.

**NO:** Contact your gas provider to set up an account and schedule equipment delivery **BEFORE** the disconnect/reconnect date provided.

- Greenfoot applies for the necessary electrical permit.
- The power company will provide a disconnect/reconnect date, which becomes the Home Owner Work Deadline to ensure gas is in place before that date.

## Generator On Site

Greenfoot completes the generator installation by pouring the concrete pad and installing the generator.

**IMPORTANT:**  
Confirmation that the gas tank is on-site and ready for installation is required before proceeding with the final step.  
  
Failure to have the gas tank in place will result in a rescheduling fee and delays.

## Final Connections

- Greenfoot Electrician completes the electrical connection.
- A gas technician connects the gas tank to the generator.

## Why make the investment?

- Protect against storm damage & costs associated with power outages (Avoid issues like water damage and food spoilage).
- Lower Homeowners Insurance
- Comfort during power outages
- Increased property value

7 yr warranty on parts, labour and travel

Vanguard® Commercial-Grade Engine

## CONGRATULATIONS!

Your home is now ready to weather the next power outage!
